1. **Business Results**

(1) *Analysis of Business Results for the Fiscal Year*

During the consolidated fiscal year ended 31 March 2011, while Japan's economic environment remained severe with continuing high unemployment rate, there were signs of partial recovery as consumer spending strengthened in some segments and corporate performance improved in part primarily among companies positioned to mark growth in overseas namely in Asia. However, the powerful earthquake that struck off the Pacific coast of northeastern Japan on 11 March 2011 caused production and consumption activities to rapidly weaken through the fiscal year-end, and there are serious concerns that the aftermath of the disaster will linger going forward.

Stock market conditions that significantly impact investment and securities-related businesses remained generally weak in Japan although the market began to look upward after hitting the bottom in the second quarter of the fiscal year. After the March earthquake, however, the stock market trembled considerably and the Nikkei Stock Average as of the fiscal year-end fell 12% year-on-year. Individual stock brokerage trading value declined 16% from a year before. Meanwhile, the emerging stock markets with high growth potential remained relatively strong despite showing signs of instability at times impacted by global conditions, and there were actively new listings on the markets.

In the operating environment surrounding the Internet financial services business, consumers continued to be increasingly aware of the merit in utilizing Internet financial services as they sought the most advantageous conditions available in pursuing financial transactions to protect their livelihood. Consequently, the business remained strong with face-to-face transactions shifting to online transactions. We recognize that the market will demonstrate vigorous growth also going forward despite the intensifying competition expected.

The consolidated performance for the fiscal year ended 31 March 2011 resulted in net sales of ¥141,081 million (a 13.3% year-on-year increase), operating income of ¥8,932 million (a 160.3% year-on-year increase), ordinary income of ¥3,525 million (a 216.8% year-on-year increase), and net income of ¥4,534 million (a 93.0% year-on-year increase).

Net sales by business segment are as indicated below. Effective for the fiscal year ended 31 March 2011, we adopted “Accounting Standard for Segment Information Disclosures.” (The Accounting Standards Board of Japan (“ASBJ”) Statement No. 17; 27 March 2009) and “Guidance on Accounting Standard for Segment Information Disclosure.” (ASBJ Guidance No. 20; 21 March 2008), and the net sales below assume the application of the standards also for the results of the fiscal year ended 31 March 2010.

3. *Management Policy*

(1) *Basic Management Policy of the Company*

The Group's core businesses are the Asset Management Business primarily involving the operation of funds both inside and outside of Japan, the Brokerage & Investment Banking Business centered on the securities business, the Financial Services Business offering a wide range of financial services, and the Housing and Real Estate Business mainly involving housing loans and real estate investments. The Group will be committed to creating more innovative services and businesses for our customers and investors, and maximize corporate value, which represents the aggregate of customers value, shareholder value and human capital value.

The Group consistently continues to base its organizational development on three fundamental concepts: (1) adherence to the "customer-centric principle", (2) development of "structural differentiation", and (3) formation of "business ecosystem". Adherence to the "customer-centric principle" signifies being committed to offering services that truly accommodate the needs of customers, which include services at the lowest commission rates and the most attractive interest rates, at-a-glance comparison of financial products, attractive investment opportunities, services offering high safety and reliability, and provision of abundant and high-quality financial content. In the Internet Age, where the concept has drastically changed, customer needs have become so diverse that their satisfaction cannot be attained simply through differentiation of price or quality of products and services. Development of "structural differentiation" refers to creating a unique "structure" that enables the Group to respond to such changes and satisfy the varying needs of customers as well as offer value based on the full utilization of the structural network. Creation of "business ecosystem" aims at promoting positive synergistic effects among constituent companies, which creates a mutual evolution process with the each of the respective markets where companies operate to support rapid growth. The Group will manage its businesses by emphasizing the formation of a "business ecosystem" that enhances the network value through promoting interactions among the Group companies as well as with other corporate groups inside and outside of Japan.

(2) *Management Issues and Future Policies*

The Group has completed the creation of a business structure in Japan as a comprehensive financial conglomerate centered on Internet-based financial services. In overseas, the Group has been rapidly expanding its investment business and establishing an investment framework primarily in Asian countries with remarkable growth.

Going forward, we will aggressively promote further expansion of our overseas investment business and provide local foreign financial institutions we invest in with innovative know-how on Internet financial services fostered through our businesses in Japan. By so doing, we expect to become a comprehensive financial group that can make contributions globally with a focus in Asia.

The Company became the first listed company in Japan to be listed on the Main Board market of the Hong Kong Exchanges and Clearing on 14 April 2011. We will maximize this opportunity to enhance our credibility and recognition in Asia to further develop businesses of the Group.

In Japan, we will accelerate growth as a provider of diverse low-cost, high-quality financial products and services by effectively taking into account the growing sentiment among consumers to cut back on their spending and the increased use of the Internet for executing various financial transactions, and further provoking synergistic effects among businesses we have developed in the Group.

In the Asset Management Business, we recognize that a high priority lies in expanding our investments in emerging countries, primarily in Asia, and establishing an effective investment system. The Company will pursue setting up funds jointly with our leading local partners while monitoring the economic conditions of such countries as we continue to push establishment and penetration of our global network. We pursue private equity investment by identifying targets and concentrating our investments in growth areas in the aim to contribute in developing industries while benefiting from high investment performance. The Group will continue to invest in four key areas of IT, biotechnology, environment and energy, and finance going ahead. In the financial sectors, we will transfer the know-how of the Group and pursue direct investment in overseas financial institutions by which we can expect to enhance the value of corporations we invest in. The Group will also invest in and finance

corporations of varying sizes and in different phases of development through operating buy-out and mezzanine funds. In undertaking these business activities, the Group will strive for further growth by continuing to aggressively utilizing the resources both inside and outside of the Group and heightening the performance of the funds we operate as we promptly improve the corporate value of companies we invest in.

In the Brokerage & Investment Banking Business, we will aim to achieve greater growth even under unstable conditions in the Japanese stock markets. SBI SECURITIES Co., Ltd. will continue to expand its overseas product lineups and strengthen foreign exchange transactions and further enhance its call center operations that receive high recognition from evaluating agencies in heightening its service level even more. We will also promote integration of “net” and “real” channels and actively make use of the intermediary business to continue expanding the face-to-face channel while achieving effective cost reductions. Furthermore, in the aim to maximizing synergies within the financial conglomerate, the Company will tighten grips with financial companies in the Group, in particular with SBI Sumishin Net Bank, Ltd., to develop the Group’s Internet-based one-stop financial service system. In the consolidated fiscal year, PTS (proprietary trading system) of high public nature operated by SBI Japannext Co., Ltd. posted a considerable increase in trading value. Going forward, we will aim to handle a greater trading value by primarily increasing participants and improving liquidity. SBI Liquidity Market Co., Ltd., which began operation in November 2008, provides liquidity and market infrastructure for FX transactions to SBI SECURITIES Co., Ltd. The firm will make improvements to the transaction environment, enhance liquidity as well as provide services to parties outside of the Group in the aim to further diversify sources of revenue in this business.

In the Financial Services Business, we established SBI Sumishin Net Bank, Ltd., SBI Insurance Co., Ltd. and other new companies during 2007 to 2008 for undertaking new businesses in our aim to build an earning structure that does not depend solely on stock markets. It is our key objective to further developing these businesses by provoking stronger synergistic effects among Group companies. In the Marketplace Business centered on operation of comparison websites such as “InsWeb” and “E-LOAN”, we must continue to expand our service lineups including enhancing content and improving functions. Additionally, in striving for higher growth, we see the need to push development of Morningstar Japan K.K., which continues to expand its services and channel offering, supported by the growing asset management needs, and SBI VeriTrans Co., Ltd., that has begun moving ahead with the Chinese business on the backdrop of the expansion in EC and credit card markets.

In the Housing and Real Estate Business, we will pursue real estate development while monitoring market conditions, through making efforts to capture business opportunities and to diversify and stabilize revenues. In the financial real estate category, SBI Mortgage Co., Ltd. has established its own brand as a provider of housing loans with low, all-term fixed interest rates. We will continue to enhance “SBI Money Plaza”, a franchise-based face-to-face channel to continue attracting customers and increasing loan drawdowns. In the lifestyle networks business category under this Business, we are determined to focus our efforts in operating brokering sites to provide useful, attractive services in assisting consumers at every stage and major event of their lives.

With a view to making a big step forward in our overseas business activities by further spurring synergies among companies within the Group, we will pursue our “Pentagon Management” strategy for the financial services business as follows.

1. Position five core businesses from the Group’s financial business ecosystem, which are securities, banking, nonlife insurance, life insurance and payment settlement services
2. Aim for exponential growth of the overall Group by driving interactions and provoking synergistic effects among core businesses.
3. With each of the core businesses in the center, place related companies and businesses as support functions around the businesses, and persist in promoting synergies among the core business to differentiate the Group from competing companies and stretch growth.
4. Expand SBI Money Plaza and other “real” channels nationwide as the infrastructure business that accelerates growth of the five core businesses and promote harmony between “net” and “real” channels. Simultaneously provide a selection of competitive products to customers by taking a “neutral position” regardless of being inside or outside the Group to become “Japan’s largest financial products distributor”.
5. Transfer the systems and know-how of the Group’s core businesses accumulated in Japan to emerging countries in accordance with the phase of economic development to develop the financial services business in those countries.

Furthermore, in July 2010, the Group launched a concept called the “Brilliant Cut Initiative”. By modeling the Group companies and businesses on facets of a diamond, namely a “58 brilliant-cut diamond”, known to be the brightest and the

most beautiful with each of the faucets giving the best shine when cut this way. The 58 major companies and business entities of the Group's business ecosystem reflect the 58 faucets of a brilliant-cut diamond, which together shine most beautifully as one. In the aim to give out the best shine as a Group, we will pursue the "brilliant-cut" initiative in shifting our management emphasis from the traditional group-wide expansion to profitability.

Under the "brilliant-cut" strategy, we will pursue the following three basic policies in the next three years.

Companies and businesses in the black:

Further expand profits through the pursuit of mutual synergies

Companies and businesses in the red:

Aim to be in the black within the next three years (for companies to be newly founded, in three years after establishment) by making effective use of Group resources and more aggressively pursuing Group-wide synergies

- * Any company or business not expected to be in the black will be dissolved or sold as a general rule.
- New establishments: With the exception of companies currently in the process of founding, no new company will be established.
- Acquisition: Limited only to profitable companies and cases that can be expected to promote strong synergies with the existing companies in the Group's business ecosystem.

The Group recognizes that continuous enhancement of human resources is an essential group-wide initiative. It has become increasingly important to secure highly competent individuals that support the rapid expansion of our businesses and to continue developing the skills of our employees. For this purpose, we have been exerting greater efforts in hiring excellent individuals who are willing to share the management philosophy of the Group as well as recruiting university graduates to secure human capital for passing on the Group's unique corporate culture from one generation of employees to the next. The initiative of recruiting university graduates that began in April 2006 has resulted in individuals with the potential to advance to senior executive positions to already contribute strongly in key positions of the organization. We will continue to secure highly competent and global-oriented human resources and promote career development of our staff in pursuing perpetual growth and development of the Group.

4. CODE ON CORPORATE GOVERNANCE PRACTICE

(1) AUDIT COMMITTEE

We have not established Audit Committee as required by the Listing Rules so that our annual results have not been reviewed by the Audit Committee. The role performed by the audit committee established pursuant to the Listing Rules is carried out by a Board of Statutory Auditors of the Company in Japan. The specific roles and responsibilities of the Statutory Auditors and the Board of Statutory Auditors correspond closely to those required to be provided by an Audit Committee under the Listing Rules.

(2) REMUNERATION COMMITTEE

The Hong Kong Stock Exchange has confirmed that we do not need to strictly comply with paragraph B.1 of Appendix 14 of the Listing Rules in respect of establishment of a Remuneration Committee. As we have appointed a Board of Statutory Auditors, the Board of Directors performs the role of remuneration committee to determine the remuneration of Directors and senior management in accordance with the Companies Act and we will not put in place a separate committee.

Save for the situation described above relating to Audit Committee and Remuneration Committee and the relevant applicable provisions of Appendix 14 of the Listing rules, we complied with the code provisions stipulated in the Code on Corporate Governance Practices as set out in Appendix 14 to the Hong Kong Listing Rules, and have generally followed the recommended best practice according to the Code on Corporate Governance Practices.

XI. EVENT AFTER THE REPORTING PERIOD

On 25 March 2011, the board of directors of the Company, in preparation for the Company's listing on the main board of the Hong Kong Stock Exchange, authorized an offering of depository receipts representing the Company's common shares (the "HDRs") in Hong Kong and certain other overseas markets (excluding the United States and Canada; the "HDR offering"), the issuance and offering (the "Underlying Share Offering") of common shares of the Company to be represented by the HDRs excluding common shares for the over-allotment (the "underlying original shares"), and the issuance and offering of common shares up to the number of shares (the "underlying shares") represented by the over-allotment portion of the HDR offering (the "Over-allotment Option").

The details of HDR offering and Underlying Share Offering are as stated below. The payment of Underlying Share Offering has been made on 12 April, 2011.

The shares will be held by the depository bank as the underlying assets of the HDR offering. Furthermore, accompanied by the HDR offering, depending on the level of demand for the offering, the Company may offer an over-allotment of up to 2,500,000 additional HDRs representing shares borrowed (the "borrowed shares") by Daiwa Capital Markets Hong Kong Limited from the Company's shareholder through Daiwa Securities Capital Markets Co.
