

Strengthening the Group Management System toward the Visualization of Business Value

The SBI Group consists of the three core businesses of the Financial Services Business, the Asset Management Business and the Biotechnology-related Business. Since FY2015, three Representative Directors have led the businesses, to enhance the driving force of the entire business domain through a pursuit of the strengthening of intra-Group collaborations, for further enhancement of synergies.

Additionally, along with a realization of Hong Kong Stock Exchange listing in April 2011 as the first Japanese company, from FY2012, SBI Holdings, Inc. voluntarily adopted IFRSs as the first Japanese financial services company to ensure transparency and accountability in its business activities, and to continue with the visualization of business value. The entire Group will continue to thoroughly promote the business “Selection and Concentration,” to further enhance the process of actualizing the business value of each business segment.
