(as of the end of September 2023)

Going Beyond Finance with Finance at Its Core

Since its founding, the SBI Group has diligently built a business ecosystem centered around securities, banking, and insurance as its core fields, utilizing the Internet as its main channel. As a result, we have evolved into one of the world's most distinctive and comprehensive financial groups.

When it comes to activities surrounding goods and services, finance is what brings it all together.

For this very reason, as a comprehensive financial group, we propel financial businesses forward, but also go beyond the field of finance. As a “Strategic Business Innovator,” we are making advances into other fields of business, where we provide indispensable goods, services, and information for a variety of lifestyles.

Capturing current trends and creating innovative businesses

SBI Group's Five Corporate Missions

01	Sound Ethical Values	We shall undertake judgments on actions based not only on whether they conform to the law or profit the Company, but also whether they are socially equitable.
02	Financial Innovator	We will transcend traditional methods and bring financial innovations to the forefront of the financial industry utilizing opportunities provided by the powerful price-cutting forces of the Internet and developing financial services that further enhance benefits for customers.
03	New Industry Creator	We strive to become the leader in creating and cultivating the core industries of the 21st century.
04	Continual Self-Evolution	We will continue self-evolution to flexibly adapt to changes in the operating environment through "Ingenuity" and "Self-transformation."
05	Fulfill Social Responsibility	We ensure that each company in the SBI Group recognizes its social responsibilities as a member of society, while fulfilling the demands of its stakeholders, contributing to the betterment of society.

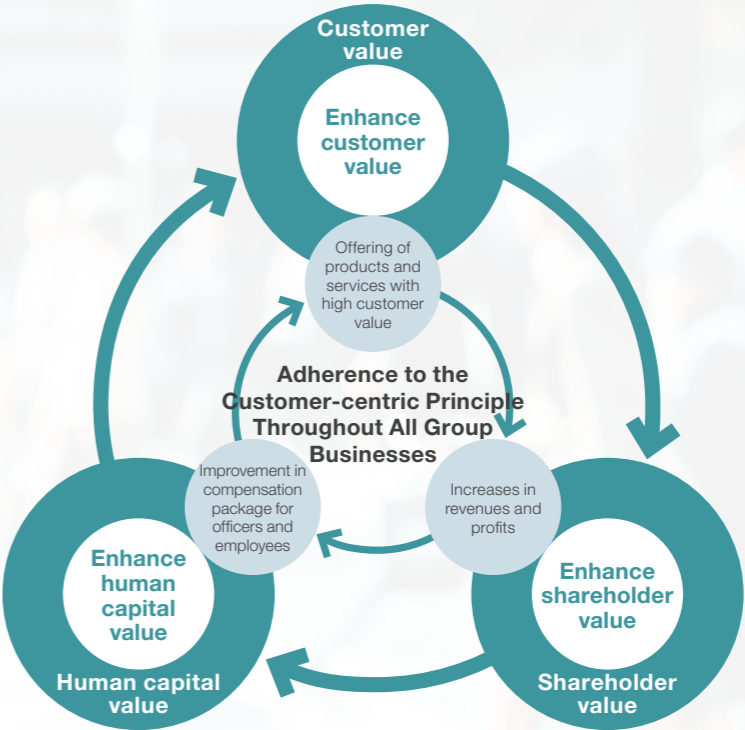

Thorough pursuit of the “Customer-centric Principle”

Since its founding in 1999, the SBI Group has actively utilized innovative technologies to thoroughly implement the Customer-centric Principle in a variety of ways, including lowering commissions, providing services with more favorable interest rates, offering attractive investment opportunities, providing safe and reliable services, and offering a wealth of high-quality financial content. We will adhere to the Customer-centric Principle in all the SBI Group’s businesses going forward.

Unwavering commitment to the “Customer-centric Principle” is the fountainhead upon which the SBI Group creates and enhances its corporate value

Mechanism for Enhancing SBI Group’s Corporate Value

Creating customer value is the cornerstone of corporate value, which is generated by intertwining shareholder value and human capital value.

Mutual Evolution and Pursuit of Group Synergies

The Five Business Segments

As a comprehensive financial group, the SBI Group has propelled financial businesses forward and also made advances into various other related fields of business.

By effectively utilizing our management resources and pursuing and demonstrating synergies that are organically linked to our business and expertise, we have built a stronger corporate group. We have also continued to produce services that reflect the changing times and meet the diverse needs of customers in each of our businesses.

Financial Services Business

Securities-related business, Banking-related business, Insurance-related business, etc.

The Financial Services Business offers innovative and convenient products and services focused on securities, banking, and insurance through the Internet to meet the customers' various financial needs, which are indispensable to their daily life.

Asset Management Business

Provision of asset management-related services

In the Asset Management Business, the Group provides a wealth of unbiased financial information from a neutral and objective standpoint, solutions for sales advisors in financial institutions, investment education and awareness campaign through seminars, and investment management and investment advice in order to contribute to optimal asset formation for investors.

Investment Business

Management of various funds including venture capital and business succession

SBI Group is making concentrated investments in growth industries such as IT, biotechnology, environment, and energy in the Investment Business. Additionally, we have built a global investment system, such as establishing a joint fund in partnership with influential local partners in emerging countries in Asia with remarkable economic growth.

Crypto-asset Business

Crypto-asset trading services and market maker business

With institutional investors entering the digital asset-related market in earnest, the Group is globally expanding businesses related to crypto-assets such as the provision of crypto-asset exchange/trading services and the market maker business, which we position as growing business fields.

Next Gen Business

Advanced businesses such as biotechnology, healthcare and Web3

SBI Group develops and sells pharmaceuticals and health foods utilizing a type of natural amino acid called 5-ALA (5-aminolevulinic acid) in the Biotechnology, Healthcare & Medical Informatics Business, and is also expanding other advanced businesses such as Web3 related business.

Providing Convenient Financial Services and Diverse Investment Opportunities

Through collaboration between Group companies, the SBI Group achieves the provision of convenient financial services and offers diverse investment opportunities to meet the wide-ranging needs of customers.

Making securities accounts more convenient

SBI SECURITIES offers a service that allows automatic cash transfer from a linked yen savings account at SBI Sumishin Net Bank or SBI Shinsei Bank to an account at SBI SECURITIES. The transferred cash can be used for stock trading or accumulation-type fund investment in SBI SECURITIES or to efficiently manage cash reserves for investment in a yen-savings account.

Meeting wide-ranging needs

SBI MONEYPLAZA is expanding joint shops co-managed with SBI Shinsei Bank or regional financial institutions throughout Japan. By offering wide-ranging financial products and services such as securities, insurance and mortgages through face-to-face transactions, SBI MONEYPLAZA provides personalized consulting and advice on high added value asset management tailored to the individual needs of each customer.

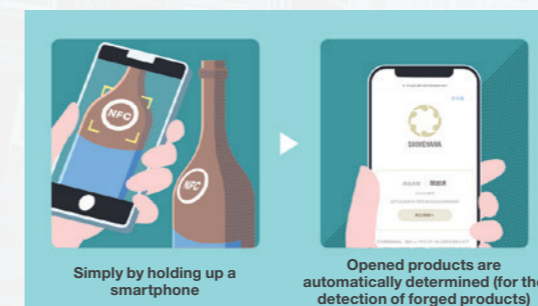

Creation of new businesses by utilizing technology

By quickly adopting innovative technologies such as Web3 and actively utilizing them at each group company, we have achieved to provide optimized services according to the changing times and customer needs.

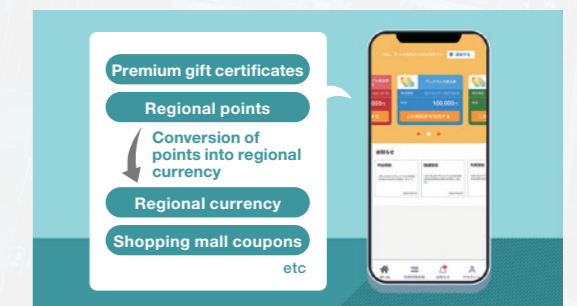

Increasing supply chain transparency

By providing "SHIMENAWA," a traceability service that utilizes blockchain technology to enforce immutability, SBI Traceability seeks to maximize the added value of products through conveying accurate information about product quality and provenance to consumers and also ensures supply chain transparency.

Supporting regional digitalization

Machi no Wa provides an information platform called "Machinoen Appli" to electronically issue and operate digital gift certificates and regional points. The platform uses blockchain technology, allowing customers in each region to carry out everything from application to purchase and payment on an app on their smartphones.

Our never changing “spirit of entrepreneurship”

Regional revitalization

The national goal of regional revitalization is one of the most important issues for the future of Japan. To contribute to regional revitalization, SBI Group strives to be more directly involved in re-energizing regional economies by deepening its alliances with local companies and local governments, with focus on alliances with the local financial institutions in each region that are vital to local communities and economies. In our regional revitalization initiatives in Shimane Prefecture, for example, we have opened “WINDY FARM ATMOSPHERE,” a large complex including restaurant and hotel facilities on the west coast, in collaboration with local businesses.

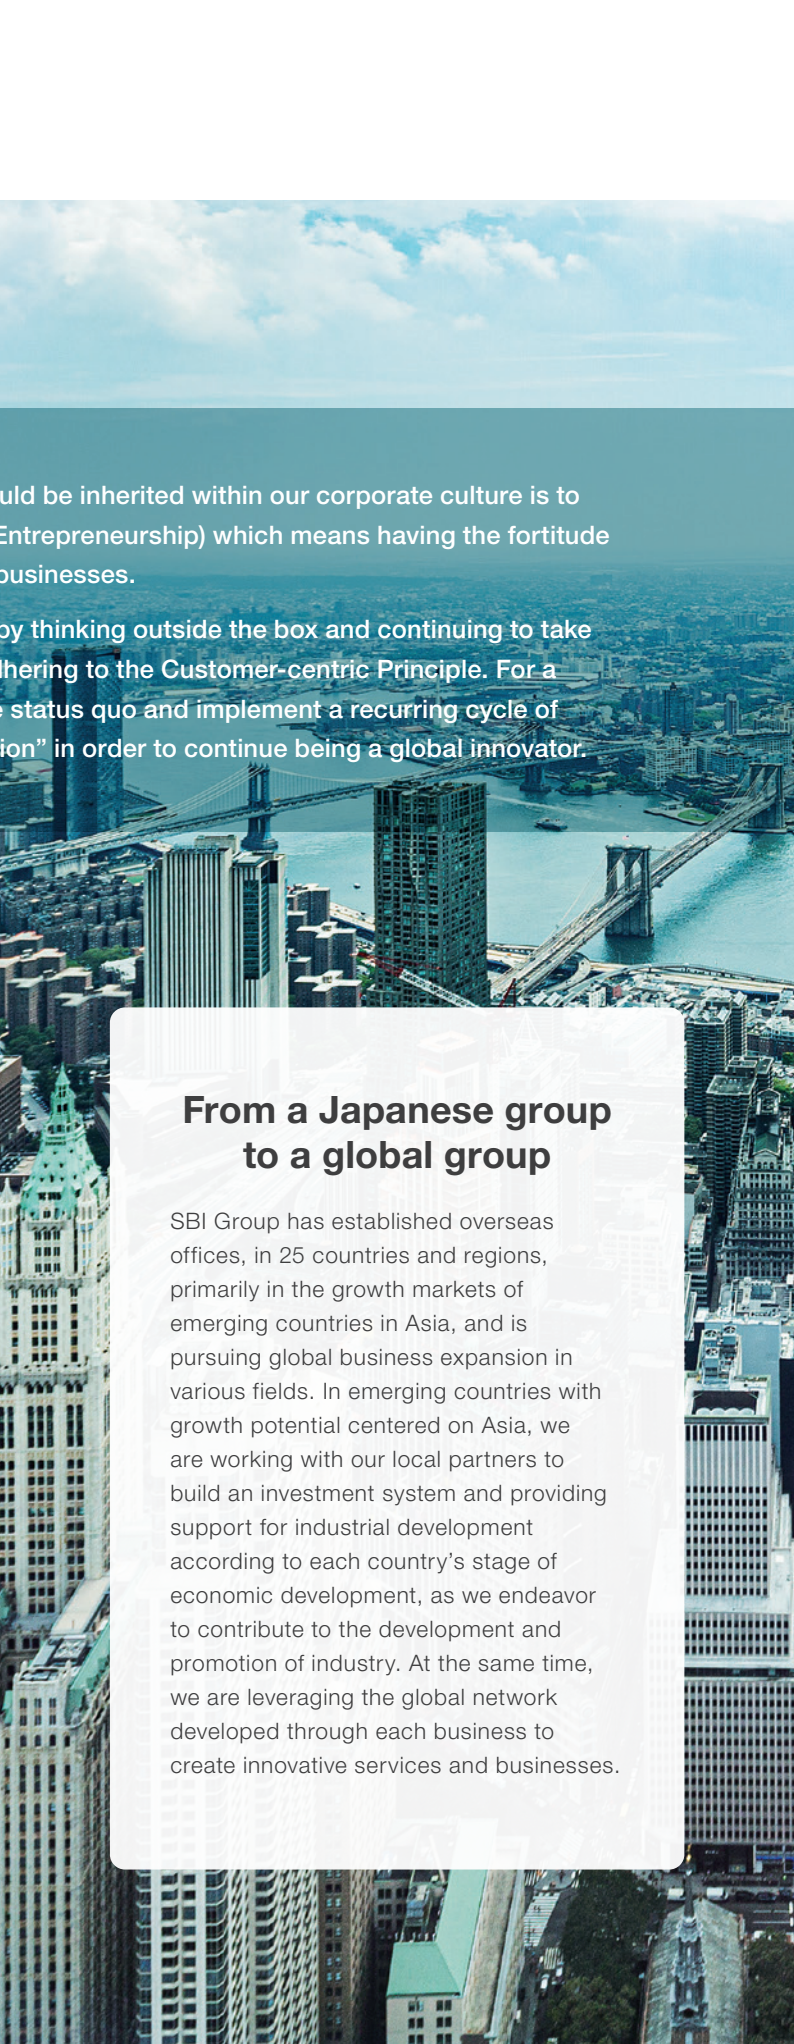

Digital space ecosystem

Since its founding in 1999, the SBI Group has been a pioneer in Internet financial services and created a range of fintech services. “Web3,” which is built on top of distributed ledger technology (DLT) such as blockchain, is said to be the way of the next generation of the Internet. In anticipation of an era of vast digital expansion permeating not only the financial sector but every facet of society, the SBI Group is currently working to evolve its business ecosystem into a “digital space ecosystem” that extends beyond the confines of the financial sector in collaboration with influential partners in Japan and overseas.

Open alliance

SBI Group is advancing its “Open Alliance Strategy,” which materializes win-win relationships with numerous external companies across various industries. Through the provision of the SBI Group’s financial capabilities to alliance partners, our alliance partners are able to further expand their service and product offering. For example, SBI Sumishin Net Bank works with its partner companies to create systems based on its behind-the-scenes role as a provider of banking functions in order to ensure a smooth, efficient experience for customers using the services of those companies.

From a Japanese group to a global group

SBI Group has established overseas offices, in 25 countries and regions, primarily in the growth markets of emerging countries in Asia, and is pursuing global business expansion in various fields. In emerging countries with growth potential centered on Asia, we are working with our local partners to build an investment system and providing support for industrial development according to each country’s stage of economic development, as we endeavor to contribute to the development and promotion of industry. At the same time, we are leveraging the global network developed through each business to create innovative services and businesses.

One of the strands of the SBI Group’s DNA that should be inherited within our corporate culture is to “Continuously maintain the entrepreneurial spirit” (Entrepreneurship) which means having the fortitude to overcome all kinds of hardships and create new businesses.

We will seek to solve the challenges facing society by thinking outside the box and continuing to take on all sorts of challenges, while at the same time adhering to the Customer-centric Principle. For a better society, we will refuse to be satisfied with the status quo and implement a recurring cycle of “self-denial,” “self-transformation,” and “self-evolution” in order to continue being a global innovator.

Working with all Stakeholders for a Sustainable Society

Contributing to society not only through business activities but also more direct initiatives

SBI Group's primary goal is to contribute to society through its business activities, and we will continue to demonstrate how the Group's growth contributes to the development of society and the realization of a sustainable society. We will strive for the perpetual evolution of the SBI Group to exist as a going concern in solidarity with society.

Our approach to sustainability

Stakeholders surrounding a business are more than just its customers, shareholders, and employees. They also consist of general consumers, business partners, and the community at large. Indeed, the SBI Group, with a keen awareness of the social nature of companies, is obliged to contribute to the maintenance and development of society. We believe that a company's social nature can be enhanced continuously through the development and implementation of strategies to ensure that the company not only contributes to society through its business activities but also contributes to society more directly.

In addition to contributing to society through our main business, we also remain committed to giving profits from our business operations back to society via direct social contributions such as the improvement of children's welfare through SBI Children's Hope Foundation and the development of capable human resources through SBI Graduate School.

Our Direct Initiatives to Resolve Social Issues

What we can do for the children who will shape the future

SBI Children's Hope Foundation

SBI Children's Hope Foundation was established in October 2005 as a foundation which carries out social contribution activities of the SBI Group to improve the welfare of children in difficult circumstances, such as being abused or neglected. In March 2010, it changed to a public interest incorporated foundation. The activities of the foundation include donation to improve the environment at residential facilities for abused children, provision training to the facility staffs, and support for the independence of children after leaving the facilities. The foundation is also actively engaged in raising awareness to prevent child abuse, including the support of the orange ribbon campaign.

Total donations to date

JPY 1.166 billion

Providing business people with the opportunity to acquire an MBA while improving their "moral philosophy"

SBI Graduate School

Established in April 2008, SBI Graduate School is a distance learning (online) college authorized by the MEXT. SBI Graduate School offers entrepreneurial business people the opportunity to acquire an MBA (Master of Business Administration) without location or time constraints. Together with practical studies that have been substantiated by theory, SBI Graduate School attaches a great deal of importance to moral education for cultivating moral philosophy and an ethical sense of values which are essential qualities for a businessperson.

Levels of student satisfaction

Extremely satisfied	31%	Slightly dissatisfied	2%
Generally satisfied	59%	Extremely dissatisfied	0%
Neither satisfied nor dissatisfied	8%		

By a survey conducted in March 2023
Target: Masters graduates Response rate: 90%

History of challenge and evolution

SBI Group has formulated and executed strategies that are in tune with the times and anticipate future challenges based on the basic viewpoints of adherence to the “Customer-centric Principle,” forming a “corporate ecosystem” and comprehensively pursuing group synergies, and thorough devotion to innovative technology. The Group has also expanded business through the pursuit of synergies beyond its core finance business based on the belief that “public benefit leads to private benefit” and the approach of “going beyond finance with finance at its core.” With the SBI Shinsei Bank Group, which joined the SBI Group in December 2021, generating various synergies with subsidiaries within the SBI Group, the SBI Group has entered a new phase of rapid growth driven by synergies and mutual evolution.

FY2022
